FEDERICO PERI

VENTURA LAMBRATE 2014 - VENTURA LIVING ROOM

Presents his furniture concept

Conceptual furniture, but at the same time really functional that takes inspiration from industrial elements, passing through '50, and finally turning them into refinement and balance.

These furniture are not “industrialized feeling”, industrial is just the world from which they draw the basics, on the contrary them gives strength to a world of craftsmanship characteristic of “made in Italy”.
