

PRESS RELEASE

Event title: Fusion

During Milan Design Week 2015 the district of the city called 5VIE will be once again the throbbing and lively heart of the culture of the Milanese project. With a path that includes shops, artistic monuments, archaeological finds and courtyards in historical buildings, 5VIE offers a program aimed at valorising the exceptional nature of cultural places focusing on the creative reality of the world of design.

Spazio Brentano hosts a path evoking a pleasurable atmosphere between internal and external, where objects mix in harmony. A single large space where the substance and form of design intertwine with plants in natural, unprecedented and original play.

Three friends, three professionals working in different yet compatible fields who believe in professional synergy aimed at carrying out integrated and innovative projects.

Natalia Pepe is a Designer and an Interior Designer specialised in the textile field. Stefania Fanchini is a Landscape Architect focused on terraces and gardens. Anna Brizzi is an Architect Designer with a passion for ceramics, which she designs and produces.

Ceramic containers, amazing for their colours and shapes, bottles covered in cloth, cushions, stools and beanbags, pouffes, lamps, a reversible and light garden sofa...cloths and many plants, a marvellous terrace in a room, which was created also thanks to the taste of Fabrizio and Claudio, two indispensable friends of Quercia Di Emma.
