

# Strackk<sup>®</sup>

**Strackk is a floating shelf with multifunctional options. The slim design of just 4 millimeters thick can carry up to 250 kilograms and can be ordered in any color and size.**

Because of its strength and design the shelf works in all kinds of functions. Books, paintings, but also heavier items such as a television, can stand on the narrow ledge. By adding magnetic hooks products as cookware, jackets or towels can be easily hanged. With some additional accessories or modifications Strackk is also perfect to store or show wine bottles and -glasses.

Meet Strackk, its creator and its many features during the Salone del Mobile, Via Tortona 31 and learn more about this unique strong shelf. Joep Melis is pleased to tell you more about this special design. For a preview, watch the movie on our website: [www.strackk.com](http://www.strackk.com)

# CULIMAAT

HIGH END KITCHENS

**Company Profile**

Culimaat High End Kitchens has set itself the goal of proving itself anew every single day. This ambition has produced concepts and designs for kitchens which distinguish themselves both in style and use of materials. In many cases this has led to collaboration with leading architects. Culimaat has a wide-ranging orientation and is currently active in countries such as the Netherlands, France, Spain, Bonaire and Dubai. Its kitchen designs do not go unnoticed in other countries either, and it is only a matter of time before Culimaat gains international status.

**Our presentation on this fair**

Culimaat is represented at this trade fair by the kitchen design 'Axis'. The design incorporates a basic frame of stainless steel, with an inlaid marble work surface and soft-touch varnished doors. The built-in appliances are by Gaggenau. View this design or other high-end kitchens at [www.culimaat.nl](http://www.culimaat.nl)
