# FABIO ORLANDUCCI

ROME - PHOTOGRAPHY, CONTEMPORARY ART

Fabio Orlanducci's art is a continuous research. A journey into the world of post-photography or post-image, which contains experimental photography, avant-garde and contemporary art.

The artist focuses on the search for both a new sighted subject and an answer to the literal explosion of the image and our new relation with it.

# LEE CHANG MIN

SEOUL - CONTEMPORARY ART

Changmin Lee is an artist from South Korea. His work has been featured in solo exhibitions in Japan (Tokyo & Nagoya), South Korea (Seoul) and the US (Chicago).

His pieces represent the modern society's complicated life patterns and flows.

# EELKO MOORER

LONDON - DESIGN

Eelko Moorer is an interdisciplinary designer-maker of interior artefacts, footwear and bespoke accessories. His research focuses on how artefacts can function as performative agents offering critical perspectives on existing typologies and contexts through design.

Moorer approaches design as language with everyday artefacts functioning as a vehicle to investigate and question the world around him. The design objects Moorer makes are animated and invested with a provocative agency aimed at seducing the audience/spectator's attention in particular ways changing from object to object.

They aim to retain an emphasis by resisting convention through and deviating from the norm.
