

CRYSTAL AUTOMATA

Mechanical marvels have fascinated mankind for centuries. The desire to give life to inanimate objects, to make them almost indistinguishable from the living, was a highly developed theme of the Arts and Crafts movement. *Crystal Automata*, Preciosa's exhibition of mechanical crystal installations, embodies the same craftsmanship of glass masters and clock makers as from that time.

Four crystal automata installations represent the eternal themes of the *Four elements*: Water, Earth, Air, and Fire. These core substances define the quality and beauty of Bohemian crystal, which has been shaped by the hands and breath of generations of craftsmen, the Bohemian Alchemists.

Thanks to the passion of these craftsmen, fascinated by the power of movement, the Crystal Automata can come alive.

Come to experience the intriguing beauty of the Crystal Automata; Four elements, at the PRECIOSA exposition Via Tortona 31.

About PRECIOSA Lighting

Preciosa Lighting – the living legacy of Bohemian glass and crystal, with a passion for lighting since 1724
