

GREENMOOD 4-7 April 2017
Via Maroncelli 12 Milano

Claudia Frignani has always chosen design for her.

In 1993, Claudia and her brother found Wunderkammer studio - the third brother, Mattia, will join later.

At Wunderkammer studio she designs and produces unique pieces and limited series, with particular attention to materials, shapes and techniques.

After exploring her creativity through a variety of materials (castings, metals, concrete, wood, leather, textiles), now pottery has become a passion in constant evolution.

Starting from a raw clay block, Claudia creates exclusively by hand, unique vases.

Starting from a poor material, she arrives to a precious manufacture, with extraordinary finishes.

To work with the hands is a need, to create a therapy.

Her inspiration comes from a curious and astonished observation of the natural world, that fascinates her since childhood.

Lines, colors, shapes, textures, stolen from nature and processed through her personal and unique search of beauty create the magic!
