

# DAAA HAUS

## PERSPECTIVES

by DAAA HAUS for Presotto

Perspectives is a modular easy to transform and assemble mirrored library wall system. It has been designed to be a stand-alone design piece that can fit in any room. It's intended to be a play on perspectives, different reflections/appearance to the eye. Objects change in respect to their relative distance and position in front of the furniture piece creating always a unique reflected image.

The material used is a mirrored laminate by SIBU, and comes in five different colour mirrors. It's a highly durable laminate ideal for daily use, easy to clean and unlike glass mirror shatterproof.

The idea of DAAA Haus was to blend the library storage with its respective surroundings, bringing the mirror to life using different angulation, turning it from a flat surface into a dynamic changing yet minimal and elegant furniture piece.

The distinguishing feature of this full body wall mirror library lies in the angulation of each door panel, which gives it multiple personalities. It is not just an object whose sole function is to that of a library but rather a decorative collectable standalone furnishing element.

### DAAA HAUS

DAAA HAUS offers a unique design process; mixing parameters, such as strategies and communication, fabrication techniques and tools, materials and technology, as well as other relevant lifestyle and cultural issues.

DAAA HAUS work always reflect a balance between form, function, communication, lifestyles and culture.

The end result is always an experience larger than the product or space itself. At DAAA we call it SIGNIFICANT DESIGN.
